

Audio/visual set-up for Brian O'Malley

303-779-4264 www.BrianOMalley.com

Please allow an average of 2 hrs. for set-up before the group is in the room.

Projection

☐ True XGA 1024x768 LCD Projector

Brian will bring a Apple MAC G3 PowerBook with a standard 15 pin VGA monitor out. Please have video cable to run from lectern to projector.

Note: Some of the new projectors are too bright for a dark room.

Sound

- ☐ Quality sound makes a difference. Note: Some "in house" sound systems sound good, some real bad.
- ☐ 1 wireless lavalier microphone
- ☐ AC outlet at the lectern
- ☐ Appropriate cords, AC outlets & sound mixer
- ☐ The sound track will be from a XLR direct box that Brian provides.

Lighting

- ☐ 1 leiko to illuminate Brian. (Some venues required an AV Tech)
- ☐ A **DARK** room is necessary (No Windows)
- ☐ Need access to room lighting control

Note: Each room & audience size is different, this is just an example. Thanks!
